Pelagic Birds of the North Atlantic - Andrew Paterson 2012

Pelagic birding is an increasingly popular pastime in both Europe and North America, with

ever greater numbers of people taking boat trips offshore to see birds such as the various species of petrel, skua and shearwater. This innovative new guide, printed on waterproof paper to withstand the rigours of oceanic trips, gives annotated illustrations of every plumage of every pelagic species, including vagrants, which can be encountered in the North Atlantic, from the Caribbean and Cape Verde Islands right up to the Arctic. In total 56 species are covered, from albatrosses through to phalaropes. The book has received high praise already, with world expert on seabirds, Hadoram Shirihai, having seen the prototype in action off the US coast and declaiming about how useful such a simple, waterproof guide would be if it were to be widely available. In short, this is a must-have guide for both novice and experienced birders on both sides of the Atlantic.

The Birdman Abroad - Stuart Winter 2011-08-05

Stuart Winters Tales of a Tabloid Twitcher earned many plaudits in 2010, as the birder journalist who brought the subjects of birdwatching and conservation to millions of red-top readers over a period of more than a decade shared some of his most captivating scoops. This second installment of tales follows a similar format and covers stories from around the world. Each of the 20 or so chapters covers a range of tales and issues at a rapid pace, and is accompanied by a series of amusing line drawings. Once again there are stories of sin and scandal mixed with serious messages about bird conservation and the environment. Thanks to Stuart's role as news editor on a national newspaper the title is guaranteed to be heavily promoted to a wide audience of interested readers of his Birdman column among the Sunday Express's weekly readership of 600,000 people, as well as in the birding and wildlife magazines for which he regularly contributes.

Advanced Bird ID Guide - Nils van Duivendijk 2010

This innovative guide will be an essential addition to the library of any serious birder. It accurately describes every key detail of every plumage of all 900 species that have ever occurred in Europe, North Africa and the Middle East - the region known to all birdwatchers as the Western Palearctic. Its level of detail is unprecedented for a book of this size. This is a guide with a difference. It has no color plates or illustrations, but instead its unique selling point is that for every species the detailed text lists the key characters of each recognizable plumage, including male, female, immature, juvenile, all subspecies and all other variations. This level of detail includes, for example, all eleven forms of Canada Goose and all nine forms of Yellow Wagtail known in the region. In the past such in-depth detail has only been available in huge multi-volume tomes. This book allows birders to take this information into the field for the first time.

Images of Montenegro in Anglo-American Creative Writing and Film - Neil Diamond 2017-01-06

This book observes images of Montenegro in Anglo-American creative writing and films from the late eighteenth century until 2016. Like the Balkans as a whole, Montenegro usually reappeared in the West's consciousness with the outbreak of wars, but remained marginalized on the larger Balkan map because of its peripheral political influence and, therefore, remained little known. In the past, Montenegro was experienced as almost unapproachable, barren, and wild. Its people, like their mountains, were seen as massive and fierce, while their primitivism equally delighted and repulsed visitors. Even today, when one searches the Internet for "Montenegro," one finds titles mostly containing modifiers circling around "undiscovered," "magical," and "mysterious." The book follows these vignettes chronologically to point out how the rhetoric they share dangerously builds a caricature of the country. However, they also provide a very lively mosaic of landscapes, history, people, their costumes, houses, and everyday life, which are sometimes distorted. No one can claim that these descriptions were not influenced by the ideologies the travellers inherited at home and were not filtered through their own cultural grids, but, significantly, they evoke places that are now forever lost - destroyed in wars, by earthquakes, faulty development planning, or, simply, by time.

Bird Watching in Mallorca - Ken Stoba 1990

A guide to what to see and where to see it.

El Refugio - Michael Ivkov 2015-10-07

Birding-a pursuit that can lead you across continents, or offer insights closer to home. In "El Refugio," Michael Ivkov tells how his own interest in the avian world began with a chance excursion and grew into a passion. The story he tells is rich in both precise observation and unexpected poetry. Well before you reach Ivkov's final page, you will be swept up in the humor, the honesty, and the ambition of the first stages of his life as a birder.

A Birdwatching Guide to Menorca, Ibiza & Formentera - Graham Hearl 1996

Birds of the Mediterranean - Paul Sterry 2004

Covering all the species of birds occurring in the areas bordering the Mediterranean, this guide is illustrated throughout with stunning photographs. The regions examined cover some of the most distinctive and birdrich habitats in Europe, the Middle East and North Africa, places as popular with sun-seeking holidaymakers as they are with birders. Designed to appeal to both audiences, the guide features photographs of the region's birdlife, with concise descriptive text on facing pages. Digital manipulation of the photographs has been used to ensure a consistent depiction of light conditions, making comparisons between the images easier.

The Good Bird Guide - Keith Marsh 2005

This book is a birdfinding guide to Britain and Europe's most coveted species. Unlike the Where to Watch Birds guides, which direct birders to good general birding sites, this guide

takes each individual species as a starting point, and picks out the best places to see that species. In this way, a birder can efficiently target those particular species that he wishes to see, making this guide especially useful to those who travel frequently but may be limited in terms of available time to explore. Each of the species accounts has information on distribution, habitat and movements, some hints and tips of finding and getting close to the species, and a list of sites in all appropriate countries where that species can reliably be found. The species accounts are followed by a comprehensive, country-by-country gazetteer of the sites covered, with site descriptions and location maps.
