*The Prince & The Dancing Girl* - Saeed Tiwana 2007-02

A dazzling page-turner, this novel depicts some of the great and near-great of history. The locale spans three continents: it is the story of wise men, heroes and fools. Peopled by a sprawling cast of memorable characters-royalty, patriots, heroic men and courageous women. The story moves with a tremendous sweep from one adventure to another, and is a network of intrigue and misunderstandings and missed opportunities, It is a powerful portrait of the great Austrian dynasty of Europe containing scenes of wealth and privilege and dire responsibility. A prince strives to inspire his people with hope and courage, gathering his forces, and stimulating them into action. While he works hard in many ways to rescue his country from the plight into which it had been thrown and all the while searching for an even deeper understanding of life and wise judgment. Politicians, philosopher and pundits lend thoughts to the judgments made by rulers and commoners alike. Princesses and exotic women add their love for the arts and fashion and enticement. All of these qualities combined make a dynamic story line for a magnetic novel. A novel crowded with beauty and incident, the search for wisdom, ambition, and adventure. A living novel which unexpectedly makes you feel you are in a story filled with people you know personally.

Neo-Stalinism - Irfan Saeed 2018-08-10

This book is a combination of Science, Philosophy, Politics and Religion. It is a highly blasphemous book disproving all religions as the fantasies of the false. Specially it is written against Islam, Koran and Mohammed. The name of the book is Neo Stalinism, as it proves that the Communism and Marxism is the only truth for the greatest cause to emancipate humans from the yoke of

slavery, bondage and exploitation of man by man. It was the dream of Comrade Stalin to abolish religions from the face of this earth but he was not capable to do so. My pen is sharper than the sword of Stalin. On the basis of reason and logic I have left no ground under the feet of religious thinkers to argue against me. Thus the greatest goal of Communism is achieved by abolishing exploitation as well as the superstitions of religions. This combination of communism with abolition of religions is named as Neo Stalinism.

In 1978, on a remote planet, Sivad and Chorn begin their adventure. Akanians have traveled the galaxy for 6,000 years. They are known as the first species to journey into space. For over a millennium, there has been minimal technical growth and no new species joining the federation. It is an exciting time because a new Blue Planet Earth is expected to join the federation of species within the next hundred years. The two geniuses, Sivad and Chorn, are creative in their thinking and known to be more mischievous than the acceptable societal standards of conformity and process. On their first assignment, Sivad and Chorn are sent on a simple information gathering mission to a remote space port, when they divert from their flight path to view the Blue Planet. They collide with a piece of space debris called Voyager IV. As they continue on their mission, little do they know that this piece of debris originated from the Blue Planet and it contains a key piece of basic technology that the rest of the galaxy desperately needs to jump a technological hurdle. The adventures begin when the technology falls into the wrong hands which could, ultimately, force a shift in

power within the galaxy. More information can be found at <http://www.SivadandChorn.com>.

**Finding the Blue Sky** - Joseph Emet 2016-10-04

Joseph Emet explores the intersection between Positive Psychology--the study of what makes people happy--and the ancient wisdom of Buddhism. Positive Psychology--with its focus not on mental "disease," but rather on what actually makes people happy--has revolutionized the way that we look at mental health. What many people don't realize, however, is that Positive Psychology is not as young a field of inquiry as we think. In fact, according to Joseph Emet, the original positive thinker was the Buddha himself. In this wise and inspiring book, Emet traces the fascinating intersection between the age-old wisdom of Buddhism and the latest scientific research into what makes people happy. In this book readers will discover: \* How to replace negative thinking with positive thinking \* How to move from frenzied thinking to quiet contemplation \* The duty we have to others to live a happy life As Joseph explains in this work, the blue sky of happiness is found just beyond the grey clouds of sadness, everyday concerns, stress, or anxiety. Readers will find that the advice in this book can act as the gentle wind that clears those clouds away.

**Blue Skies and Thunder** - Virgil Westdale, Stephanie A. Gerdes 2009-12-21

In 1942, Virgil Westdale was a successful young flight instructor when the government ousted him from the Air Corps and demoted him to army private. Having grown up as a Japanese American midwestern farm boy, Westdale had his first taste of Japanese culture when he was sent to train with the all Japanese American unit, the 442nd Regimental Combat Team. He was ultimately transferred to the 522nd Artillery Battalion, where, as a member of the Fire Direction Center, he helped push the Germans out of Italy, rescue the "Lost Battalion" in France, and free prisoners from Dachau Concentration Camp in Germany. After the

war, Westdale went on to pursue a career in research and development with large corporations. He received twenty-five U.S. patents and earned an international award for his work with photocopier components. In retirement, he has been working for the TSA, returning to the worlds of aviation and national security. Written for the lay reader as well as the history buff, Westdale's stories of World War II challenge preconceived notions of what we think we know about a soldier's life in Europe and offer images that go beyond the history books. --- "Spanning over ninety years, Virgil's amazing and complex life story vividly reflects America's history from the early 1900s to our current fight against terrorism. His book reads if he were sitting before me casually sharing his life. A highlight of my career—both as an Army officer and a Federal Civil Servant—has been the honor of working with and getting to know Virgil Westdale, a great American. This is a truly fascinating and memorable autobiography." John H. Mumma, Colonel, US Army Retired Federal Security Director, Transportation Security Administration ---"Virgil Westdale's *Blue Skies and Thunder* tells a story that is both unique in American history and uniquely American. After growing up as a Midwestern farm boy whose Japanese father had largely assimilated into the local community, he found himself after Pearl Harbor viewed with suspicion by the very government he wanted to serve in the Second World War. Denied a chance to serve as a military pilot, or even as a pilot trainer, he eventually found his way into a newly created Japanese American artillery unit and served with distinction in Italy, France and Germany. Back in the United States, he completed college and made a career for himself as an engineer with multiple patents to his credit, and eventually served his country a second time, as an airport security officer. His account is highly readable and offers insights into a wide range of aspects of both his own life and the world around him." Dr. James Smither, Director Grand Valley State University Veterans History Project
