

Saving Australias Smaller Wildlife

Thank you for downloading **Saving Australias Smaller Wildlife**. Maybe you have knowledge that, people have look hundreds times for their favorite novels like this Saving Australias Smaller Wildlife, but end up in infectious downloads.

Rather than enjoying a good book with a cup of coffee in the afternoon, instead they are facing with some malicious bugs inside their laptop.

Saving Australias Smaller Wildlife is available in our book collection an online access to it is set as public so you can download it instantly.

Our book servers spans in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Merely said, the Saving Australias Smaller Wildlife is universally compatible with any devices to read

Wildlife of Australia - Louise Egerton 2009-09-01

There is nothing to beat the extraordinary wildlife of Australia. Its colourful parrots, its venomous snakes, its abundance of hopping marsupials and the strange, egg-laying Platypus - these are just a few of the players in a story that began hundreds of millions of year ago. Many members of Australia's wildlife live nowhere else on Earth. They are unique, the result of evolution on a continent that has been geographically isolated from the rest of the world for 38 million years. Wildlife of Australia is an account of how these animals have developed in response to changing climates and habitats. It describes their day-to-day habits, where they live, how they find partners and care for their young, and how they protect themselves and find food and shelter. Superbly illustrated with over 550 colour photographs by renowned wildlife photographer Jiri Lochman, the book also contains a list of scientific names, good zoos and wildlife parks, useful websites and books, and a comprehensive glossary. Wildlife of Australia reveals the fascinating worlds of the animals that live all around us on this ancient land but remain largely unnoticed.

100 Animals - Nick Garbutt 2007

100 Animals to See Before They Die is inspired by the Zoological Society of London's recently launched conservation project EDGE - Evolutionarily Distinct and Globally Endangered. EDGE targets some of the world's most bizarre and unusual creatures, animals which are extremely distinct in the way they look, live and behave. They have few or no close relatives and require immediate action to save them from extinction. If they disappear there will be nothing like them left on the planet. Amazingly, many of these species are ignored by existing conservation plans. 100 Animals fights this ignorance by highlighting the danger these species are in and will encourage greater involvement in the fight to save them. Some EDGE species, such as tigers, elephants and pandas are well known, but 100 Animals features dozens of lesser known and extraordinary animals such as the Yangtze River Dolphin (the world's rarest cetacean), the Bumblebee Bat (the smallest mammal on earth) and the egg-laying Long-beaked Echidna. Organised by world regions (Eurasia, Australasia, Africa, New World, South East Asia, the Oceans) and with a whole section devoted to Madagascar, 100 Animals is inspirational and packed with information about each animal and where to find it. Each animal is illustrated in colour and accompanied by a distribution map and information about its key

characteristics and the specific threats it faces, plus details about any conservation work taking place.

Captain Kangaroo Saves the Day - Mandy Foot 2014-10-14

The new book in this bestselling series, featuring everyone's favourite Aussie character, Captain Kangaroo. It's been a long, hot, dry summer in the Aussie outback - and today it's bushfire weather. Luckily, Captain Kangaroo is in the skies and when he spots flames, he knows just what to do! While the fireys spring into action, Captain Kangaroo and his grandad, Old Pa Roo, help save the animals in this action-packed adventure. PRAISE for Mandy Foot's work: 'Fun, sunny and beautiful...The Wheels On The Bus is a must-own for any proud Australian reader - and would make a timeless gift for little friends overseas.' Kids Book Review

Defenders of Wildlife News - 1969

Bindi Wildlife Adventures 3: Bushfire - Bindi Irwin 2010-06-01

Come and join Bindi Irwin on her next wildlife adventure! While on an early morning bushwalk, Bindi and her best friend, Rachel, notice smoke on the horizon. On a super-hot day, this can only mean one thing. Bushfire! The girls spend an exhausting day helping out at the Australian Wildlife Hospital, caring for the victims of the fire.

The Koala - Carl R. Green 1987

Imagine if koalas, gorillas, or alligators were to suddenly disappear from Earth. Sadly, this is exactly what may happen. Many species of animals are now listed as being either threatened or endangered. This means that they may soon become extinct. Each book in the Endangered and Threatened Animals series examines the characteristics and habitat of a species at risk of extinction. The author also explains what people are doing to save these animals. The Report Links take the reader to the best Web sites, source documents, and photos related to the study and survival of each species. These books contain a message about the Endangered and Threatened Wildlife list, an animal facts page, chapter notes, a further reading list, and an index. Read about the characteristics and habitat of the koala in Carl R. Green's fine addition to the Endangered and Threatened Animals series. Topics covered include the legends and history of the koala, as well as the loss of habitat and natural predators of the koala.

Saving Australia - Vincent Serventy 1988

Penguin the Magpie - Cameron Bloom 2021-03-30

Penguin the Magpie is the extraordinary true story of recovery, hope, and courage as one injured bird and her human family learn to heal and celebrate life, featuring the gorgeous photography of Cameron Bloom and a captivating narrative by New York Times bestselling author of *The Blue Day Book* Bradley Trevor Greive. People around the world have fallen in love with Penguin the Magpie, a global social media sensation, and her adventures with her human family. But there is far more to Penguin's story than meets the eye. It all begins when Sam, Cameron Bloom's wife, suffers a near fatal fall that leaves her paralyzed and deeply depressed. One of their three sons, reeling from the tragic accident, discovers an injured magpie chick abandoned after she had fallen from her nest. The boys name the bird Penguin, for her black-and-white plumage. As they nurse Penguin back to health, the incredible joy, playfulness, and strength she exudes fortify the family and especially lift Sam's spirits. Penguin's resilience demonstrates that, however bleak things may seem, compassion, friendship, and support can come from unexpected places ensuring there will always be better days ahead. This plucky little magpie reminds us all that, no matter how lost, fragile, or damaged we feel, accepting the love of others and loving them in return will help to make us

whole.

Wildlife Tourism, Environmental Learning and Ethical Encounters - Ismar Borges de Lima 2017-06-13

This book outlines the status quo of worldwide wildlife tourism and its impacts on planning, management, knowledge, awareness, behaviour and attitudes related to wildlife encounters. It sets out to fill the considerable gaps in our knowledge on wildlife tourism, applied ecology, and environmental education, providing comprehensive information on and an interdisciplinary approach to effective management in wildlife tourism. Examining the intricacies, challenges, and lessons learned in a meaningful and rewarding tourism niche, this interdisciplinary book comprehensively examines the major potentials and controversies in the wildlife tourism industry. Pursuing an insightful, provocative and hands-on approach, it primarily addresses two questions: 'Can we reconcile the needs of the wildlife tourism industry, biodiversity conservation, ecological learning and animal ethics issues?' and 'What is the Future of the Wildlife Tourism Industry?'. Though primarily intended as a research text, it also offers a valuable resource for a broad readership, which includes university and training students, researchers, scholars, tourism practitioners and professionals, planners and managers, as well as the staff of government agencies.

On Our Watch - Nicola Markus 2009-02-01

Our stewardship of this country's natural assets over the past two hundred years has been appalling, and on the current trajectory of careless environmental pillaging, further massive decline would be a certainty. The future of the environment is being decided on our watch. Australia faces unique conservation challenges that most Australians do not know enough about. On Our Watch is an attempt to remedy this situation. Respected conservationist Nicola Markus believes that it is time people realised that our environmental issues are not being solved by those tasked with their solution, and that the support and involvement of the public is essential if we are to make a difference in environmental conservation. In this thoroughly researched and passionately written book, Markus explains the very real and immediate threats to Australia's natural environment and cuts through the spin to show how you can become involved in conserving our environmental heritage.

The Little Blue Penguins of North Sydney Harbour - Gavin Phillips 2015-05-19

Gavin is a 5th grader from western Pennsylvania teamed with park rangers and scientists in Australia to construct a story that celebrates the conservation efforts to save the Little Penguins of Sydney Harbour. Any and all profits from the sale of this book benefit the Foundation for National Parks and Wildlife in Sydney Australia.

Extinct - Benjamin Gray 2021-10

Australia is home to an incredible diversity of native animals. While Australian animals are among the most unique in the world, they are also among the most endangered, with hundreds currently on the brink of extinction. We must act quickly if we are to save these species, as once gone, they are gone forever. *Extinct* is a collection of artworks from established and emerging Australian fine artists, each depicting an Australian animal that has already, for various reasons, tumbled over the edge into extinction. *Extinct* laments their loss, but also celebrates their former existence, diversity and significance. The stunning artworks are accompanied by stories of each animal, highlighting the importance of what we have lost, so that we appreciate what we have not lost yet. *Extinct* features artworks from Sue Anderson, Brook Garru Andrew, Andrew Baines, Elizabeth Banfield, Sally Bourke, Jacob Boylan, Nadine Christensen, Simon Collins, Lottie Consalvo, Henry Curchod, Sarah Faulkner, Dianne Fogwell, David Frazer, Martin George, Bruce Goold, Eliza Gosse, Simone Griffin, Johanna Hildebrandt, Miles Howard-Wilks, Nick Howson, Brendan Huntley, Ben Jones, Alex Latham, Rosemary Lee,

Amanda Marburg, Chris Mason, Terry Matassoni, Rick Matear, Eden Menta, Reg Mombassa, Tom O'Hern, Bernard Ollis, Emma Phillips, Nick Pont, Geoffrey Ricardo, Sally Robinson, Anthony Romagnano, Gwen Scott, Marina Strocchi, Jenny Watson and Allie Webb.

Save the Koala Bears - Dee Phillips 2020-01-16

Check out this new journal geared to endangered wildlife - specifically the Koala Bears that are at risk in Australia. You can show you care and support the cause for these cuddly creatures with this little journal - perfect for writing thoughts, notes or ideas, keeping lists, creating poetry, keeping as a diary or planner, helping to get co-ordinated, or a hundred other uses. It is just the right size (6" x 9") for throwing in a purse, bag or backpack so it will be handy for use anywhere. It has blank lined pages with a beautiful header that matches the cover on each page. This little journal would make the perfect gift for any animal lover.

Steve and Me - Terri Irwin 2007

Terri Raines took a vacation from her wildlife rescue work in Oregon, traveled to Australia, and there, at a small wildlife park, she met and fell in love with a tall, blond force of nature named Steve Irwin. They were married in less than a year, and Terri eagerly joined in Steve's conservation work. The footage of their crocodile-trapping honeymoon became the first episode of *The Crocodile Hunter*, and together, Steve and Terri began to change the world. Here Terri recounts the adventures they shared--wrangling snakes, saving crocodiles from poachers, swimming among whales. A gifted naturalist, Steve was first and foremost dedicated to rescuing endangered animals and educating everyone he could reach about the importance of conservation. In the hit TV shows that continue to be broadcast worldwide, Steve's enthusiasm lives on.--From publisher description.

Flames of Extinction - John Pickrell 2021-04-15

Over Australia's 2019-20 Black Summer bushfire season, scientists estimate that more than three billion native animals were killed or displaced. Many species - koalas, the regent honeyeater, glossy black cockatoo, the platypus - are inching towards extinction at the hands of mega-blazes and the changing climate behind them. In *Flames of Extinction*, award-winning science writer John Pickrell investigates the effects of the 2019-2020 bushfires on Australian wildlife and ecosystems. Journeying across the firegrounds, Pickrell explores the stories of creatures that escaped the flames, the wildlife workers who rescued them, and the conservationists, land managers, Aboriginal rangers, ecologists and firefighters on the front line of the climate catastrophe. He also reveals the radical new conservation methods being trialled to save as many species as possible from the very precipice of extinction.

Steve & Me - Terri Irwin 2007-10-30

When Terri Raines was twenty-seven years old, she took a vacation that changed her life. Leaving behind her wildlife rescue work in Oregon, Terri traveled to Australia, and there, at a small wildlife park, she met and fell in love with a tall, blond force of nature named Steve Irwin. They were married in less than a year, and Terri eagerly joined in Steve's conservation work. The footage filmed on their crocodile-trapping honeymoon became the first episode of *The Crocodile Hunter*, and together, Steve and Terri began to change the world. In *Steve & Me*, Terri recounts the unforgettable adventures they shared -- wrangling venomous snakes, saving deadly crocodiles from poachers, swimming among humpback whales. A uniquely gifted naturalist, Steve was first and foremost a wildlife warrior dedicated to rescuing endangered animals -- especially his beloved crocs -- and educating everyone he could reach about the importance of conservation. In the hit TV shows that continue to be broadcast worldwide, Steve's enthusiasm lives on, bringing little-known and often-feared species to light as he reveals and revels in the wonders of our planet. With grace, wit, and candor, Terri Irwin portrays her husband as he really was -- a devoted family man, a fervently dedicated

environmentalist, a modest bloke who spoke to millions on behalf of those who could not speak for themselves. Steve & Me is a nonstop adventure, a real-life love story, and a fitting tribute to a man adored by all those whose lives he touched, written by the woman who knew and loved him best of all.

Carnivores of Australia - Alistair Glen 2014-11-05

The Australian continent provides a unique perspective on the evolution and ecology of carnivorous animals. In earlier ages, Australia provided the arena for a spectacular radiation of marsupial and reptilian predators. The causes of their extinctions are still the subject of debate. Since European settlement, Australia has seen the extinction of one large marsupial predator (the thylacine), another (the Tasmanian devil) is in danger of imminent extinction, and still others have suffered dramatic declines. By contrast, two recently-introduced predators, the fox and cat, have been spectacularly successful, with devastating impacts on the Australian fauna. Carnivores of Australia: Past, Present and Future explores Australia's unique predator communities from pre-historic, historic and current perspectives. It covers mammalian, reptilian and avian carnivores, both native and introduced to Australia. It also examines the debate surrounding how best to manage predators to protect livestock and native biodiversity. Readers will benefit from the most up-to-date synthesis by leading researchers and managers in the field of carnivore biology. By emphasising Australian carnivores as exemplars of flesh-eaters in other parts of the world, this book will be an important reference for researchers, wildlife managers and students worldwide.

Crossings - Katy S. Duffield 2020-10-13

This powerful nonfiction picture book explores wildlife crossings around the world and how they are helping save thousands of animals every day. Around the world, bridges, tunnels, and highways are constantly being built to help people get from one place to another. But what happens when construction spreads over, under, across, and through animal habitats? Thankfully, groups of concerned citizens, scientists, engineers, and construction crews have come together to create wildlife crossings to help keep animals safe. From elk traversing a wildlife bridge across a Canadian interstate to titi monkeys using rope bridges over a Costa Rican road to salamanders creeping through tiny tunnels beneath a Massachusetts street, young readers are certain to be delighted and inspired by these ingenious solutions that are saving the lives of countless wild animals.

Earth First - Jeni Kendell 1987

[Bindi Wildlife Adventures 10: Monkey Mayhem](#) - Bindi Irwin 2011-02-01

Come and join Bindi Irwin on her next wildlife adventure! At very short notice, the Irwins are called on to run an ecolodge in Madagascar for a fortnight. They arrive to find the place deserted, and realise they have a lot of work to do before a bus load of American tourists arrive. Madagascar is full of the most amazing wildlife - lemurs and chameleons galore - and it doesn't take long before Bindi and Robert are on a hair-raising lemur rescue mission, which is a lot more exciting than sweeping floors and tidying beds at the ecolodge!

[Bindi Wildlife Adventures 12: Mission Climate Change](#) - Bindi Irwin 2011-02-01

Come and join Bindi Irwin on her next wildlife adventure! Bindi, Robert and their Wildlife Warrior pals have been invited to speak at a climate change conference in icy Finland. All the kids are super excited! But when the conference organiser, Professor Tikkanen, mysteriously disappears the night before the conference begins, Bindi and Robert realise they have two missions. One: to find the Professor, and Two: Make the international community aware of how important the issue of climate change is to the next generation!

Bat Hospital - Clare Hibbert 2014-12-15

Fruit bats are also called flying foxes. In some parts of the world, dangerous ticks have harmed these bats, causing them to get sick and even die. The Tolga Bat Hospital in Australia is a place created to help sick and orphaned fruit bats. Readers see for themselves how the workers at this hospital take care of fruit bats, including how they feed them and help them learn to fly. Facts about bats are presented through informative text and eye-catching fact boxes. Readers will be amazed by the full-color photographs of the bats found in this hospital!

Hector Helps Clean Up the Park - Claire Culliford 2020-10

The first book in The Little Helpers series, a new collection of climate-focused children's books. Hector is a kind little hedgehog who likes playing with his friends in the park. When he sees the old park keeper has a problem he wants to help. But what can a hedgehog do for a human being? Hector Helps Clean Up the Park is the first in a series of children's picture books written in accordance with a number of the United Nations' Sustainable Development Goals. With fantastic, colourful animal characters, the stories show children how helping each other and their environment can be lots of fun! The books are suitable for use at home or in the classroom and include questions for discussion on the topics raised - a useful supplement for teachers.

Bindi Wildlife Adventures 9: Lost! - Bindi Irwin 2011-02-01

Come and join Bindi Irwin on her next wildlife adventure! When a German tourist goes missing in the outback, volunteers are called in to help search Kakadu National Park. Bindi and her Aboriginal friend DJ decide to take a different route when they spot a sulphur-crested cockatoo that seems to want to show them something. The cocky leads them to the grateful tourist but the cockatoo seems to have disappeared. And they need it to help find their way back . . .

Australian Wildlife After Dark - Bruce Thomson 2016-04-01

Australia is a land of many unique animals, some of which are active only during the cooler evening and night-time and so are rarely seen. These are the after dark animals so widespread yet so little noticed by humans, whether in our backyards, the arid desert, woodlands or rainforest. Australian Wildlife After Dark brings this hidden fauna into the light. The after dark fauna includes a surprising diversity of familiar (and some not-so-familiar) species, from cockroaches, moths and spiders through to bandicoots, bats and birds - and then some. Each example is described in a unique, friendly style by Martyn Robinson, familiar to many Australians through his frequent media appearances on ABC Radio and in Burke's Backyard magazine, and Bruce Thomson, an internationally renowned wildlife photographer and bat researcher. The book includes stunning photography and boxes that highlight selected topics, such as the 'windscreen wiper' eyelids of geckoes and the strategies used by night-time plants to attract pollinators. Also included are practical tips on finding nocturnal wildlife, a glossary of scientific terms and a short bibliography.

Saving Sun Bears - Sarah Pye 2020-06-23

Malaysian ecologist Dr Wong Siew Te, or 'papa bear', has dedicated his life to saving the sun bear-world's smallest bear-from extinction. Australian author Sarah Pye takes readers on a journey of discovery, introducing individual sun bears she has come to know. Saving Sun Bears is Wong's story-and theirs.

Bindi Wildlife Adventures 1: Trouble At The Zoo - Bindi Irwin 2010-06-01

Come and join Bindi Irwin on her next wildlife adventure! Bindi's birthday party at Australia Zoo is going to be HUGE. Karaoke, animal rides, dancing competitions, it's all happening! But when a spoilt ten-year-old boy decides he wants to take home one of the zoo's precious water dragons, chaos ensues.

Saving Wildlife - Jenny Vaughan 2007

Our Earth is in danger. People have damaged it in all kinds of ways. This series examines the

main problems and suggests how we can help to put it right.

Young Geographer class 7 - SHOPNA GHOSH

Young Geographer, a series of Geography textbooks for classes 6-8, follows the latest syllabus guidelines of Council for the Indian School Certificate Examinations. The books have an attractive layout and have been designed with interesting features and activities to facilitate students and teachers with better knowledge-sharing sessions.

A Focus on Deserts and Grasslands - Jane Hinchey 2018-09-01

FACT! Australia has the worst mammal extinction rate in the world. Many of our native bird, reptile, fish and amphibian species are endangered. AUSTRALIA'S ENDANGERED ANIMALS... AND THEIR HABITATS is an exciting new series that takes a look at some of Australia's most threatened animal species and their unique habitats. Learn about: • Dozens of Australia's most vulnerable creatures • The habitats where Australia's animals live, feed and breed • Identifying characteristics that make a species vulnerable • Australian and international classification systems • Threats animals face and what is being done to save them • What YOU can do to make difference Inside each book you'll find current information, maps, statistics, fun facts, and photographs. Every book is a valuable resource designed to support Australian students and teachers, and meet Australian National Curriculum requirements.

Orange Coast Magazine - 1984-05

Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As Orange County's only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county's luxe lifestyle.

Animals Are Us - Victoria Thompson 2023-02-03

'This book will save lives—human and animals.' Victoria Thompson is a passionate advocate for the protection of animals from great harm. She movingly describes our appalling failures in this regard and praises those who press for the enlightened awareness and humane treatment of animals. She believes profoundly that we must not continue to think of animals as just resources to exploit—for animals too have a right to live naturally. And she gives us solutions for a kinder world. 'Victoria's book is a real ground-breaker and may well become the new bible for those seeking to save our fellow species from immense suffering and even extinction.' Irina Dunn

A Voice for Animals - Suzana Gartner J.D. LL.M. 2023-02-21

Animals are here with us and not for us. We can do better for our animal friends when we work together collectively and individually to make a difference; by joining hands in this next great, important social justice movement. A Voice for Animals offers insight on animal issues and the animal rights movement. The first part of the book examines the close connection we share with our beloved companion animals, and the plight of homeless animals. It bridges the gap between beloved pets and homeless pets in shelters. It offers solutions to end the shelter debacle. The second part discusses the lives of other species: farm animals, animals in research, animals in captivity, and wildlife. This book provides heartfelt real life animal stories, celebrates animal victories, and explores the deep connection of animals to humans and our biological need to share our lives with them. It inspires readers to take action and get motivated for animals: adopt animals from shelters and rescues, live a cruelty-free lifestyle, and go vegan. This book advocates for the better treatment of animals by inviting you to gain an understanding of the special human-animal bond.

Bindi Wildlife Adventures 2: Game Over! - Bindi Irwin 2010-06-01

Come and join Bindi Irwin on her next wildlife adventure! Bindi and her South African friend, Hannah, are on a horse-riding trek of a lifetime in South Africa, when they discover that the supposed breeding sanctuary for the giant sable antelope is actually looking more like a game reserve for rich tourists with big guns. But the girls get found out spying, and may not get a chance to tell anyone what's really going on!

Australia - Jeffery Pike 2002

With evocative, full-color photography on every page and cross-referenced, full-color maps throughout, this installment of the world's largest visual travel guide series provides readers with the ultimate insider's perspective on the land down under.

Defenders of Wildlife News - Defenders of Wildlife 1974

Australian Wildlife Conservancy - Hannah Sheppard Brennand 2021-11-03

Australia is home to some of the most unique wildlife in the world, from the improbable Bilby with its enormous ears, to the Purple-crowned Fairywren with its loyal partnerships, to the highly social Great Desert Skink. But this wildlife is in crisis. In just over two centuries, over 100 plant and animal species have become extinct and every year Australia's threatened species list continues to grow. Australian Wildlife Conservancy's (AWC) mission is to halt these extinctions and turn back this decline; to effectively conserve all Australian animal species and the habitats in which they live. The late Martin Copley AM, founder of AWC, purchased the organisation's first sanctuary in 1991. Thirty years on, AWC is a global leader in conservation, working alone or in partnership across a vast 6.5 million hectares of the continent: restoring biodiversity from the Kimberley to Cape York and from the Coral Coast to the Eyre Peninsula and Sunshine Coast. This book provides a window into AWC's history and a look to the future. This insightful and hopeful collection of stories gives evidence of the passion and immense effort invested by all those involved with the organisation. Featuring writing from the AWC family, past and present, including Tim Winton, Tim Flannery, the late Thomas Lovejoy and Sarah Legge, this book traverses the challenges and triumphs that mark the first thirty years of AWC.

Wild Whiskers and Tender Tales - Ute Wegmann 2011

Wild Whiskers and Tender Tales takes you behind the scenes of native Australian wildlife conservation, into the hearts of the people who commit their lives to rescuing, protecting and nurturing some of our most beautiful and endangered species.

Save the Fairy Penguins - Katherine Scaper 2005

Perform this script about a group of seventh graders who fight to save the lives of Australia's fairy penguins.

Penny Helps Protect the Polar Ice Caps - Claire Culliford 2020-11

The second book in The Little Helpers series, a new collection of climate-focused children's books. Penny is a positive little penguin who likes sliding along the ice caps into the sea. When she finds out that the ice caps are in danger because of climate change, she wants to help. But just what can a penguin do to stop the ice caps melting? Penny Helps Protect the Polar Ice Caps is part of a series of children's picture books written in accordance with a number of the United Nations' Sustainable Development Goals. With fantastic, colourful animal characters, the stories show children how helping each other and their environment can be lots of fun! The books are suitable for use at home or in the classroom and include questions for discussion on the topics raised - a useful supplement for teachers and parents.
